

# ECO FRIENDLY WEED CONTROL

## Proven Benefits for Soil Microbiology

- ✓ Bioherbicide
- ✓ Fast acting & effective
- ✓ Fully biodegradable  
- No harmful residues
- ✓ Environmentally sustainable
- ✓ Non-toxic to humans, livestock  
& the environment
- ✓ Glyphosate-free
- ✓ Effective on many glyphosate  
resistant species
- ✓ Cost competitive with other  
nontoxic products

**Contact Organics Weed Terminator 20 & Contact Organics Boost** is more than just Weed control  
It improves soil health

### Testimonial

## How it works

Contact Organics Weed Terminator 20 is a non-selective bioherbicide made from acetic acid for the control of common annual & perennial broad leaf weeds & grasses.

Contact Organics Boost contains a proprietary blend of ethoxylated alcohols & natural oils and is a proven performance enhancer for acetic acid-based herbicides. Contact Organics Weed Terminator 20 works by stripping away the waxy outer layer of the plant, promoting dehydration and resulting in complete desiccation.

SCAN FOR MORE INFORMATION

Regenerative agriculture means restarting the cycles of nature that technology broke. Technology being: tillage, synthetic fertilizer, synthetic chemicals, GMO seeds, subtherapeutic antibiotics, hormone implants, and the rest. This is accomplished through routine animal impacts followed by long rest periods. Contact Organics nontoxic herbicide does not disrupt or break the cycles of nature but works with them.
